# Capstone - Semester Project

- Due Dec 10 by 11:59pm
- Points 2,000
- Submitting a text entry box or a file upload

The TryHackMe Advent of Cyber 2023 event is a unique cybersecurity challenge that covers variety of topics including penetration testing, security operations, security engineering, digital forensics, incident response, **machine learning**, and the analysis of vulnerable software. The format of learning is varied, incorporating detailed articles and instructional videos to ensure a comprehensive and engaging experience.

Throughout the semester, we have machine learning labs that are directly related to task 7, 8, 20, 21, and 21. The remaining tasks will be part of **Capstone - Semester Project**

Submission will be 20 screenshots of the answers for each remaining labs: 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 23, 24, 25, 26, 27, 28, 29, 30, 31

As this is a longer assignment, it is recommended that you complete at least one lab per week to keep pace. Enjoy!
